

# Telecommunications Directory

Now online on *Gale Directory Library*

*Telecommunications Directory* is a detailed resource for information on the myriad of products, service and activities in the telecommunications field, profiling thousands of organizations, services and systems used in the delivery of data, voice, text and/or images. International in scope, *Telecommunications Directory* covers the complete range of products and services related to electronic communications, from satellite, cellular and Internet service providers to local exchange carriers,

microwave networks and personal communications services.

Each edition of *Telecommunications Directory* features detailed entries on more than 9,000 global telecommunications companies. Multiple editions are available by standing order, ensuring access to the most up-to-date information as well as historical data. Entries typically include: company name; full contact information, including mailing address, phone number, e-mail address and URL (when available); descriptive information; functions/services; geographic areas served; NAICS and SIC codes; intended market; pricing information; and much more.

## Real-world users might include:

- Business professionals can quickly locate telecommunications service providers and create a contact list organized by geographic area
- Marketing managers looking to expand globally can easily identify telecommunications companies serving specific areas of interest
- Job seekers can instantly create a mailing list of telecommunications companies specializing in specific systems and services
- And many others

## ABOUT GALE DIRECTORY LIBRARY

With *Gale Directory Library*, researchers can use state-of-the-art functionality to perform a range of data sorting, filtering and exporting. These innovative features, unlike anything seen previously from our directories, make *Gale Directory Library* the essential tool for research.

- Find contacts — Finding a company, person, publication (or other kind of entity) is easy. Basic search lets users quickly look up names, search by keyword, and browse the full text of your directory holdings.
- Generate lists, analyze trends — Export search results and use them in programs like Excel or Word, making the creation of mailing lists a snap.
- Cross-searchable — Search across our growing number of directory titles. Each directory can be searched individually by its own unique data fields, or search the entire directory collection.

## Additional benefits of *Gale Directory Library*:

- Use it like a database; buy and own it like a book collection
- State-of-the-art search, sort and export features
- Available 24/7 from any Internet-connected computer
- Choose the directory titles you want, and own the data
- Print, e-mail or download individual entries
- Entries include hot-linked Web sites and e-mail addresses (when available)
- Export results to analyze data or generate mailing lists
- Includes more data than print version, when appropriate
- Marked items lists let you select entries to generate custom results
- Available backfiles provide historical data
- Growing list of available directories
